

COVERINGSEASON 2022
WWW.KRONSHOF.COM

DRAUPNIR FRÁ STUÐLUM

IS2011187105

V: Kiljan frá Steinnesi (8,78)

VV: Klettur frá Hvammi

VM: Kylja frá Steinnesi

M: Þerna frá Arnarhóli (8,27)

MV: Páfi frá Kirkjubæ

MM: Vaka frá Arnarhóli

Iceland's most popular stallion is now at home with us! Our new arrival Draupnir convinces all along the line. His own performance and his offspring speak for themselves. Already his first offspring were among the highest rated in their age classes in 2020 and 2021. The overall package of this stallion is perfected by his striking colour and size. After Draupnir already got the best mares in Iceland, we are very happy to now make this breeding guarantor available to breeders on the continent.

Palomino with star and snip, born 2011

Insemination: 02.05.- 31.08.

Size: 1,50 m, BLUP: **128** Points,

FENRIR FRÁ FETI

IS2014186903

V: **Loki frá Selfossi (8,43)**

VV: Smári frá Skagaströnd

VM: Surtla frá Brúnastöðum

M: **Fljóð frá Feti (8,13)**

MV: Gauti frá Reykjavík

MM: Frá frá Feti

Fenrir frá Feti starts his breeding career on the continent with us at Kronshof. Fenrir is a very elegant and huge black stallion with four exceptional gaits (RE four gaits: 9.15!). He is always eager to please his rider and his character of gold makes him a favorite in every stable. His canter is particularly noteworthy. For his extremely jumped canter with a lot of elasticity he deservedly received a 10.0. We are happy to be able to use Fenrir in our breeding. Take advantage of this unique opportunity in Germany and breed your next dream horse.

Thank you Nils Christian Larsen for entrusting us with your superstar.

Black, born 2014

Insemination: 19.04.- at least 30.06.

Size: 1,52 m, BLUP: **122** Points,

ÓÐINN VOM HABICHTSWALD

DE2010163007

V: Fannar frá Kvistum (8,69)

VV: Nagli frá Þúfu

VM: Frigg frá Heiði

M: Óskadís vom Habichtswald (8,58)

MV: Teigur vom Kronshof

MM: Ósk frá Klængsseli

Óðinn is one of the most impressive Icelandic horses around with his complete fivegait package (DIM Gold 2018 & 2021, World Breeding Champion 2019). Pedigree, own performance and his quality offspring are his XXL bonus and make him the most sought-after stallion in the country. Óðinn is the first German stallion with a rideability over 9 and the highest rated overall. Among his offspring are countless licensing winners, leaders in the foal ranking and also under saddle the first offspring are already highly evaluated. A stallion that leaves nothing to be desired!

Brown, born 2010 / Insemination: 02.05.-31.07., / pasture: 15.08. – 30.09.

Size: 1,45 m, BLUP: **125** Points,

Mares >8,00: € 1.600 / Mares >7,75: € 1.700

Coveringfee: € 1.800 / Deposit: € 400,00

MÖKKUR FRÁ FLAGBJARNARHOLTÍ

IS2011186821

V: Hófur frá Varmalæk (8,34)

VV: Hróður frá Refsstöðum

VM: Kengála frá Varmalæk

M: **Mirra frá Þúfu (8,33)**

MV: Orri frá Þúfu

MM: Iðja frá Þúfu

Powerful gaits, huge size and enormous presence - these are attributes that best describe Mökkur. He is the highly elegant sport fourgaiter everyone wishes for: a lot of flow in tölt, swinging basic gaits with a lot of expression and movement. His score of 8.81 points in fourgaited rideability speaks for itself. His first offspring convinced us completely and we are excited to find his qualities also in his offspring.

Black, born 2011

Insemination: 02.05. – 31.08.

Size: 1,47 m, BLUP: **112** Points,

Mares >8,00: € 1.000 / Mares >7,75: € 1.100

Coveringfee: € 1.200 / Deposit: € 400,00

ÓRÍON VOM KRONSHOF

DE2016134224

V: **Óðinn vom Habichtswald (8,79)**

VV: Fannar frá Kvistum

VM: Óskadís vom Habichtswald

M: **Emma vom Kronshof (8,22)**

MV: Tenór von Birkenlund

MM: Stygg vom Kronshof

As the highest rated five-year-old German stallion in 2021 and licensing winner in 2019, this beautiful Óðinn offspring has already made his presence felt. Óríon not only impresses with his outward appearance, his lovely character, but especially with his clearly separated fluid gaits with always expressive and spectacular movements. We are sure that the success story of this stallion is far from over.

Blue dun, born 2016 / Insemination: 02.05. – 17.07. / pasture: 18.07. – 30.09.

Size: 1,47 m, BLUP: **122** Points,

Mares >8,00: € 1.000 / Mares >7,75: € 1.100

Coveringfee: € 1.200 / Deposit: € 400,00

PILTUR VOM KRONSHOF

DE2017134199

V: **Viktor fra Diisa (8,63)**

VV: Garri frá Reykjavík

VM: Svana frá Neðra-Ási

M: **Óskadís vom Habichtswald (8,58)**

MV: Teigur vom Kronshof

MM: Ósk frá Klængsseli

Piltur's world champion pedigree leaves nothing to be desired. The young Óskadís son reminds us very much of his mother. The elasticity, movements and gait quality that make Óskadís so special can also be found in this young talent. Coupled with his enormous presence this makes him very interesting as a future top fourgaiter for breeding and sport.

Ridden, Piltur already exceeds our expectations and we are very much looking forward to present our 2021 licensing winner (four-year-old) under saddle. Use this rough diamond also in your breeding.

Black, born 2017

Insemination: 02.05.-31.08.

TOTAL 8,27

STUD CONDITIONS FOR THE COVERING OF ICELAND MARES 2022

Only Icelandic mares with papers are accepted. Please enclose a copy of the pedigree certificate as well as a possibly existing breeding evaluation with the registration. The discounts listed in the price information refer to scores of FIZO-assessed mares. The mares must be free of contagious diseases and come from a disease-free herd. All mares must present a bacteriological swab sample with negative results (not older than 28 days) as well as a negative swab sample for CEM (not older than 90 days). The CEM swab must be taken from the clitoris, which is thus also possible in pregnant mares without any problems. The results of the swab samples must be proven by laboratory findings, freely formulated certificates are not accepted. The test report must indicate the location where the sample was taken. These hygiene conditions also apply to mares with foals at foot. In the case of illnesses and injuries for which veterinary treatment appears necessary, a veterinarian will be called in by the stallion owner at his own discretion at the expense and on behalf of the mare owner. The same applies mutatis mutandis to any necessary blacksmith work. The mares must be prepared for all-day grazing, dewormed, vaccinated, halter-trained and unprotected.

The best possible accommodation and care is provided. However, the stallion owner accepts no liability for death, damage, theft or reduced value of the mare or the associated foal, regardless of the cause. The Stud Owner shall also not be liable for any damage caused by the delivery of the mare to the stallion or by the act of mating itself. The liability of the stud shall be limited to such damages caused by gross negligence or wilful misconduct on the part of the stud, any further liability shall be excluded. The exclusion of liability also includes the activities of vicarious agents and also extends to their possible intent. The mare owner shall be exclusively liable for any damage caused by his horse. He/she is responsible for ensuring that the horse is covered by a liability insurance policy covering all cases of animal owner liability and other risks. The boarding costs in the group are € 8.00 per day in the pasture (pasture covering) or € 9.00 per day in a communal paddock close to the farm (hand covering, insemination on site) and € 14.00 for accommodation in a box or in a single paddock. We charge € 10.00 per mating attempt/covering by hand. Mares coming for hand covering or to the insemination station should be in heat on delivery or the heat cycle must be known. Additional expenses for eczema care or administration of medication will be charged at € 5.00 per horse and day (care products and medication not included), and € 10.00 per day for presentation to the vet.

In order to ensure daily eczema care or medication administration, it must be possible to catch the mares in the pasture without any problems. Pasture coverings come about when there are at least five mares.

The insemination station at the Kronshof is certified by the responsible Chamber of Agriculture of Lower Saxony and is supervised by a veterinarian in accordance with the applicable regulations. The stud fee is due once, semen shipment can be requested twice per heifer, delivery by overnight express in the morning until 8:00 a.m. (Tuesday to Saturday) € 50.00 each. Weekend delivery (Sunday, Monday) is not possible. For detailed information on insemination see separate mare information. FOR STALLIONS USED FOR INSEMINATION OR HAND-COVERING, A SHORT ABSENCE DUE TO THE TOURNAMENT IS POSSIBLE DURING THE COVERING PERIOD.

An amount defined in the respective stallion information will be charged as registration fee, which will be fully deducted from the stud fee. The amount is considered as reservation/processing fee, is due upon registration and will also be retained in case of cancellation or non-pregnancy of the mare. Rebookings within the breeding season are possible with the following fees: Covering of another mare by the same stallion (change of mare): processing fee € 50.00, Covering of the same mare by another stallion (change of stallion): generally only possible with Kronshof-owned stallions, processing fee € 100.00. Please transfer the amount to our account. All remaining costs are to be paid in cash or by ec-cash upon collection of the mare. All prices printed for services at Kronshof include VAT.

If mares are not in foal when covered by stallions, the stud fee will be refunded. In this case, the registration fee will be retained as a processing fee. The prerequisite for the refund is a veterinary certificate, which must be available no later than 6 weeks after collection or last insemination of the mare. Please note that pregnancy/non-pregnancy cannot be determined with certainty within the first 16 days after covering. If Kronshof's own stallions are used for breeding, it is alternatively possible to inseminate the same mare again free of charge in the following year - if the mare does not become pregnant, the claim to further inseminations expires.
